Rahul’s Birdhouse

When Rahul was seven years old he built a bird house on his favourite tree in the garden at the same height as his own. Five years later, at age twelve, Rahul returned to see how much higher the bird house was. If the tree grew by 15 inches per year, how much higher would the bird house be?

There are three prizes of Rs 500/- each for three correct entries. In case of a large number of correct entries, the prize winners will be selected through a draw of lots. The decision of the Editor, Science Reporter will be final.
